How a GPO Can Help Your Practice

Independent Dental Solutions (IDS) is a group purchasing organization (GPO) **designed by dentist, for dentists** to help private practices reduce their costs and increase the profitability of their practice.

IDS leverages the collective buying power of the group to negotiate lower, contracted pricing on equipment, supplies and other purchased services, enabling dentists to **not only survive, but to thrive**.

IDS was founded in 2017 by two private practice dentists and two supply chain leaders who sought to **unify** independent practitioners, **preserve** private dentistry and level the playing field in an increasingly corporate industry.

While GPO's are common in the medical industry, they have only recently entered the dental market. By joining a GPO like IDS, private dental practices receive **all the same benefits of a corporate dental group, while remaining independent**.

Need A Few More Reasons To Join?

- Membership is **FREE**
- The **Savings Continues to Grow** As The Group Does
- Members Have **More Financial Predictability**
- Members Can Request **A FREE Financial Assessment** to Identify All Available Savings Opportunities for Your Practice
